

Gentlemen. I am writing to you with reguersed to BPL (broadband over powerlines). Being infoved with the Sarasota Fl county for 21 years as R.A.C.E.'S. coordinater, I know what that will do to our HF transmisson. It will make it useless. We depend on that during hurricanes, tornado's etc.

Please think about it a long time and don't make any snap decision's, because the futher of amatuer radio will depend on your decission.
